

What IQ means?

Intelligence Quotient

IQ, or intelligence quotient, is **a measure of your ability to reason and solve problems**. It reflects how well you did on a specific test compared to other people of your age group. While tests may vary, the average IQ on many tests is 100, and 68% of scores lie between 85 and 115

The average iq is = 100

Good iq = 116

Lowest iq = >70

Mental age(m)

Iq calculation = ----- X 100

Chronological age (Your main age)(ca)

Suppose your mental age is 20(m) and main age is 21(ca), then
 $20/21 * 100 = 95.2$

Your iq is 95.2 which is average (WAIS)*

IQ score

What's the normal IQ range?

There are several kinds of tests to calculate your IQ. The one most trusted and widely used is the Wechsler Adult Intelligence Scale (WAIS) *– its fourth edition has the following score range:

IQ Range (“deviation IQ”)	IQ Classification
130 and above	Very Superior
120 to 129	Superior
110 to 119	High Average
90 to 109	Average
80 to 89	Low Average
70 to 79	Borderline
69 and below	Extremely Low

What Is the Average IQ By Age?

There isn't any actual data on the average IQ by age. However, there's some information about age groups, and here are the scores that denote 'normal or average intelligence.'

Age Range	Average IQ Score
16 to 17-year-olds	108
18 to 19-year-olds	105
20 to 24-year-olds	99
24 to 34-year-olds	97
35 to 44-year-olds	101
45 to 54-year-olds	106
Over 65 years old	114

Famous persons IQ :

Newton 190

Einstein 160

Bill gates 160

Elon musk 155

Mark Zuckerberg 150

WHAT IS YOUR IQ ?
